Commissioner for Patents

The Reply Brief filed on June 27, 2005 is acknowledged.

It is noted that Appellant now proposes an example to illustrate the intended use of the "valid order" in the present invention (page 4, last paragraph). First, this argument was already addressed in the Examiner's Answer at pages 6-7, and second, the examiner cannot find where such an example is disclosed in the specification as originally filed. It is also noted that Appellant cites additional references to the specification to lend support for the "means for" language of claim 25 (page 4, top). Still, cited paragraph [0029], for example, defines a "valid order" no further than an order in which all shared components are installed after all non-shared components. Curtis likewise teaches a valid order in which the depending program is installed after all dependent components, as indicated at page 5 of the Examiner's Answer.
